DETAILED ACTION

Status of Claims

Claims 1-28 are pending.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Information Disclosure Statement

Receipt of the Information Disclosure Statement filed 10/15/03 is acknowledged. A signed copy of the 1449 is attached herewith.

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-26 in the reply filed on 10/07/05 is acknowledged. The traversal is on the ground(s) that Groups I and II are

Art Unit: 1626

not patentably distinct. This is found persuasive therefore the restriction of record, mailed on 09/07/05 has been withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "phenolic precursor", line 3 of claim 1, is indefinite because the dictionary meaning of a precursor is "one that precedes and indicates or announces another to come". The specification does not define the said phrase but rather, provides examples of such.

Allowable Subject Matter

Claims 27 and 28 are allowed over the prior art of record.

U.S. Patent numbers 6,423,863 and 6,852,872 is cited to show the state of the art.

None of the cited references teach the use of chemical additives (lithium, magnesium, or combination thereof) in a carbonylation process. Thus, the instant method is neither anticipated nor render obvious by the two references.
